DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of figs. 36-42, 43, claims 14-39 in Paper No. 5 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (e) the invention was described in-
 - (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
 - (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 14-18, 23-29, 34-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Bredal et al. The patent to Bredal et al teaches structure as claimed including a top deck having a peripheral edge, foot members (609) including a cutout (U-shape section), the legs positioned at a corner (side).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 19-22, 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bredal et al in view of Elder et al. The patent to Bredal et al teaches structure substantially as claimed as discussed above including foot members, the only difference being that there is not a non-peripheral foot member. However, the patent to Elder et al teaches the use of a non peripheral foot member to provide additional support and rigidity to be old. It would have been obvious and well within the level of ordinary skill in the art at the time of the invention was made to modify the structure of Bredal et al to include an additional foot member to provide support, as taught by Elder et al since such structures are conventional alternative members used for the same intended purpose, thereby providing structure as claimed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Constantino et al, Brown et al teach structure similar to applicant's.

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
